

User Interface | Landing Page Design

Monster - The Yeti Edition of NFTs

The UI design for this NFT collection is designed to provide a delightful and rewarding experience for holders and hodlers alike. The UI encapsulates the charm of these small yetis, with a visual aesthetic that is both endearing and captivating. Navigating through the collection is a seamless and engaging experience that showcases each Yeti's unique personality and characteristics.

The user-friendly layout highlights the valuable features and rewards for those who hold these precious NFTs. It's a gateway to explore the world of Yeti NFTs and discover the benefits that come with ownership. The Monster Yeti Edition UI design is responsive, ensuring a smooth and immersive experience on all devices. Whether you're exploring from your desktop or a mobile device, the design adapts to provide a consistent and delightful user experience.

About Monster

Monster is a hyper-deflationary token with an elastic supply and distinct reserve and incentive systems that implement a variety of rewarding policies. The expertise of the development team behind Monster and our beloved community, together creates the best ever de-centralized monetary storage token.

The Roadmap

Phase 1: Inception

A cute little Monster hatched with the ideas of our beloved crypto community. We believe that great project planning and strategic partnerships are key to our token's success.

Phase 2: Marketing

Our marketing team focuses on advertising and promoting Polygon Monster throughout mainstream crypto websites. We believe that our enormous marketing budget will take our cute monster to the next gen crypto enthusiasts.

Phase 3: Community

Our beloved community trusts us not because we say it, but because they believe in our vision to build a modern de-centralized monetary system. We're built and backed by a community for the community.

Tokenomics

Hyper-deflationary

Monster is a hyper-deflationary token with an elastic supply and distinct reserve and a smart contract that is audited to be fool-proof.

Fungible

All issued tokens have the same value and are completely identical to each other in the network.

Reward Wallet

Holders and huge investors of Monster tokens will be awarded with rewards from the reserved reward wallet.

High Liquidity Pools

High liquidity is added and reserved by project administration to ensure smooth transaction capabilities.

How to buy \$TOKEN

1. Download and Install Trust Wallet

You can download and install Trust Wallet application or any similar application that gives a polygon network supported wallet.

2. Buy some \$BNB

You can directly buy some \$BNB through the application or transfer some \$BNB from an exchange like Binance.

3. Visit PancakeSwap DAPP

Then, visit PancakeSwap using your browser integrated with the wallet.
Now, connect your wallet to it via the right network.

4. Buy Monster tokens

Select \$BNB to \$Monster conversion and enter the amount you'd like to buy. Finally, sign and complete the transaction.
